

Crossfield Chronicle

Vol. 3, No. 20

EDMONTON, ALBERTA, FRIDAY, OCT. 5, 1951.

Subscription \$2.00 Per Year

CLAUDE L. BAXTER, 84-day fast ended, sips glass of milk. The 41-year-old Chicago chef started on a 160-day fast in order to dramatize the plight of the world's starving, collected around \$50, gave up.

Garden Club Complimented

CROSSFIELD — Mrs. Frank Latu, Garden Club leader, was very pleased when she opened a communication from Miss Priscilla Mewha bearing congratulations on the success of Crossfield Happy Gang Garden Club. For the second successive year this club has been selected as the best spring club in the Calgary district. In making this selection the activities of the club are considered, general interest, the garden tour, and the annual flower show.

Note—Correcting an error sent by local editor, the shrub class should read as follows: 1, Barbara Bills; 2, Joanne Copley; 3, Margaret Aldred.

Newspapers Condemn Attack On Press

HAVANA: Cuba — (BUP) — Newspapers of all political complexion here condemned police closure of a small opposition newspaper and yesterday's smashing of a Communist newspaper printing plant by a gang of raiders.

Police closed the tiny "Tempo en Cuba" and held its publisher, representative Rolando Masferrer, briefly. Subsequently, Masferrer was released by Cuban intelligence agents. The Cuban Congress also has lashed out at his arrest.

Masferrer says he expects to straighten out all "legal difficulties" in time to get his paper out tomorrow.

Denies Split In Labor Movement

Winnipeg — (BUP) — President A. R. Mosher of the Canadian Congress of Labor denied there is any split in the congress executive.

Mosher stopped briefly in Winnipeg en route to his headquarters in Ottawa.

He said the fact that one person resigns does not indicate a split in the ranks of the organization.

He was referring to the resignation of Pat Conroy as secretary-treasurer of the C.C.L. at the wind-up of the Congress' convention in Vancouver, last week.

Mosher said he hopes Conroy will reconsider his decision and resume his work with the Congress "when he has had time to consider all factors involved."

MADDEN MURMURS

Mrs. Mary Green has purchased a home in Calgary and, together with her family, will soon take up residence there.

On Sunday, Sept. 30 at 11 a.m., at the Rally Day service, Rev. Ball of United Church officiated at the baptism of Wayne Harold, infant son of Mr. and Mrs. Harold Rach; and Maxine Pearl, infant daughter of Mr. and Mrs. Douglas Havens. Next Sunday will be Thanksgiving. Please bring many flowers, fruit, vegetables and grains suitable for decoration, and left on Saturday at the church would be appreciated.

Mr. and Mrs. H. Turnascliff and infant, of Olds, visited with the latter's sister, Mrs. H. Baxter.

The Ladies Aid catered with lunch at the J. O. Baker sale on Oct. 1.

Bazaar To Be Held Dec. 1

CROSSFIELD — At the last meeting of the W.A. of the Anglican Church the members decided to hold Saturday, Dec. 1st as the date for their annual bazaar, sale of home cooking and tea. This will be held in the Community Hall on that date.

Good News For Troops In North

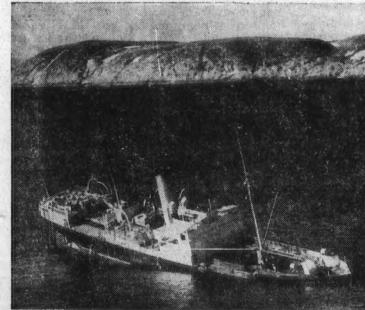

CALGARY, Alta. — (BUP) — A scientific party that has arrived here after spending three weeks in the Arctic North, has three new today for future Arctic soldiers. Such things as mosquitoes and other biting insects will not bother them.

The party consisted of government entomologist James Chilcott and Averard Downe, a local science student.

Chilcott and Downe made their studies at Spence Bay, 300 miles north of the Arctic Circle on Boothia Peninsula. During their studies, which were made while living chiefly as do the Eskimos in the area, they found an unusually great amount of insect life.

They said, however, that there were very few species in the North that were harmful to man.

The Red Cross Groups Sponsor Sale, Tea

VETERAN of 32 Arctic trips, the Nasco is shown as she appeared after going aground on a reef off Cape Dorset, Baffin Island, near the entrance to Hudson Bay. The ship was on her regular run to outfitting ports of call along the barren coasts of Hudson Bay when she went aground.

\$35,000 CREDIT UNION THEFT

HUMBOLDT, Sask. (BUP) — The former secretary-treasurer of the St. Gregor, Saskatchewan Credit Union is on trial on charge including one of the theft of more than \$35,000 of the union's funds.

Edward Loehr, being tried at Humboldt by Justice W. T. Thompson, was told yesterday that discrepancies totalling \$35,472 were revealed when a balance sheet was drawn up.

Field Auditor C. A. Snell of the Department of Co-ops testified he made the check last February and the amount of the discrepancies.

Loehr has pleaded not guilty to the theft charge and others of forgery and making false entries in the records of the credit union.

They said, however, that there were very few species in the North that were harmful to man.

CROSSFIELD—The Red Cross

consisting of East Group, Crossfield, and Madden Groups are together sponsoring a sale of home cooking and a tea in the Community Hall on Saturday, Nov. 3rd. The general convenor for home is Mrs. J. Schifflett; for Crossfield, Mrs. Charney and Mrs. Stevens; for Madden, Mrs. Dodd, and for East Community Mrs. Stewart.

In a letter received from Mr. G. A. Shave, assistant to the commissioner, to our president, Hector McDonald, he advises that a plaque bearing the words "Thank you for your support" will be placed on the door of a two bed ward which is being furnished by money turned over by these groups. Mr. Shave explains that the cost varies from \$800 to \$1400, according to equipment required in the treatment of certain diseases.

The groups that solicit everyone's patronage as there is ample opportunity for utilizing any monies raised on Saturday, Nov. 3, to further this wonderful project.

Sid. Willis, 72, An Old-Timer, Passes

CROSSFIELD—Once again one of the old timers has quietly slipped away from the presence of the late Sid Willis, 72, of Crossfield, on Sept. 26 at his home after a very short illness. He came to Red Deer from Gateshead, Newcastle-on-Tyne, England, in 1892, moving to Crossfield in 1909.

Surviving are his wife, Florence; three daughters, Mrs. Q. C. Howarth, Grand Falls, Mont.; Mrs. Hoban, Alberta; and eight grandchildren; one great-granddaughter, and one brother, James, in England.

Mr. Willis was past master of the Crossfield Masonic Lodge and a past noble grand of the Odd Fellows Lodge here. For many years he served as secretary-treasurer of the Crossfield and District Old Timers' Association. Mr. Willis kindly served as secretary for many organizations and will be remembered for many years as orchestra and choir leader for the United Church, and as a talented musician.

Rev. C. W. Morrison officiated at the funeral service Wednesday, September 28, assisted by Rev. Ball. The choir sang "In the Garden". The centre of the church was completely filled with Masons, who came to pay their last respects to a brother who will be sadly missed. The pallbearers were comprised of friends, all old Friends of Masons: Hugh McLean, V. T. Tomlinson, Thomas Blizard, Chas. Cox, Bill Faulio and Harry May. Interment followed in the Crossfield cemetery, where the Masons once more honored their departed brother with graveside rites.

Deep sympathy is extended to the bereaved family by Crossfield and district.

DOG POUND NEWS BRIEFS

Mrs. Raymond Vaughan spent a weekend at her home in Windebeuf, B.C. While there she attended the wedding of her younger sister.

Honoring Miss Mary Hick, a miscellaneous shower was held in the Dog Pound Hall on Sept. 18. Yellow and white streamers decorated the bride's chair and the top stores.

Mr. and Mrs. William Brown of Calgary were week-end guests at Mr. and Mrs. Henry Hoffman's home.

Mrs. James McArthur was hostess to a Stanley Wax demonstration on Sept. 7, with fourteen ladies present. After the demonstration a tasty lunch was served by the hostesses.

Corrine Williamson, who has been ill with pneumonia, is up and around again.

Mrs. Ritson-Bennett and daughter Jeanne, of Calgary, have been visiting her sister and brother-in-law, Mr. and Mrs. James McArthur.

Mr. and Mrs. Devins Announce Engagement

CROSSFIELD—Mr. and Mrs. R. Devins Montgomery, wish to announce the engagement of their youngest daughter, Ethel Doreen, to W. Neil Brooks of Bowness, son of Mr. and Mrs. William Brooks of Derland, Ont. The marriage will take place Oct. 6.

Mr. Frank Mossop, formerly of Crossfield, is a patient in Colonel Belcher Hospital.

DAIRY FARMING has taken on a new trend, as anyone can see by the picture above. Farmers are now using "loafing pens" and "milking parlors." Cows stay in the loafing pens all year, are fed on hay stored in silos. Increases in milk production have been recorded and experts forecast an ultimate benefit to Mrs. Consumer who gets her milk in bottles.

You're Known By Your Friends

The British Labor party members are in the same quandary over unwanted friends as were the members of the Canadian C.C.F. party in the last election. The Communists have announced that in the coming election in Britain, on October 25, they will give their support in constituencies where they have no candidate to the Labor government candidate. These unwanted supporters are likely to prove a serious embarrassment to the smooth running of the campaign. The electors are bound to say: "Birds of a feather flock together!"

It will be of little use for Labor to protest that they don't want this support from the out-and-out reds. Like the C.C.F. in Canada, the Labor party in England stands to the left of the line of demarcation. They may protest that they are pink and not red, but the commonsense electors want something more radically different in colors than pink and red. Pink at anytime is only washed-out red, or faded red!

The desperate efforts of the Canadian pinks to convince the electorate that their pink had no shade of red in it, before the last election, when the Labor Progressives were broadcasting their intention of supporting the Socialists at the polls can easily be recalled.

But it is not likely that the combination of red shades from pink to purple, will fool anybody in Britain. Everybody knows a Communist at a glance, but it is not so easy to discover a Fellow Traveller.

By-Passing \$100,000

For two years, autoists and truckers between Edmonton and Redwater and other points north of Gibbons, besides the local residents, have been patiently awaiting the completion of a new bridge which crosses the river just one mile north of Gibbons. It will connect two stretches of well built-up highway grades and enable drivers to avoid the tortuous trails through the sand hills.

Well, the bridge is finished now. It has taken a long time—longer, we think, than it should have taken, and with luck it may be in use sometime this fall, if it hasn't been officially opened by the time this gets into print. It cost \$100,000 and should be good, and we believe it is good.

Comes the dawn of a new era for drivers in this area—but hold it! The government has decided not to use their new bridge for the paved road. Surveys have already been made to build a complete new highway just a few miles west of the present road and an entirely new bridge will be required. The recently finished \$100,000 bridge will be bypassed by all except local traffic.

We realize there is a great deal of rivalry between Bon Accord and Gibbons and each, naturally, wants the highway to run nearest their villages. But the highway route should have been definitely settled before any expensive bridge building was started.

Do It Well

One of England's most treasured antiques is a bit of old iron shaped something like a black saucepan without the handle. Edward the Black Prince wore it when he went into battle. When he died in 1376 the crested helm, together with other insignia was hung in Canterbury cathedral over his tomb.

It is believed the helm was fashioned by an armorer living in London, and time has proved that this ancient knight of the anvil and hammer did his work well.

The moral of this is that all work done well is much better than work that is skimped, whether in commerce, industry, trade or learning. There is need these days for the teaching of the old adage in the schools, "If a thing is worth doing at all, it is worth doing well."

Note and Comment

Private capitalism will work well when private capitalists work well.

We happen to be a little suspicious of these "do-it-yourself" books.

Homesteading Is Not Past

By T.B.W.

The day of pioneering in Canada is not altogether gone, despite the statements of news commentators to contrary. In northern Alberta there is an area of 3,000,000 square miles of good agricultural land, just 300 miles north of the city of Edmonton. This fertile stretch of land, considered to be non-agricultural territory not many years ago, includes the small settlements of Keg River, Paddle Prairie, and Fort Vermilion in all of which there are scattered farms today.

The results of experiments made at the Fort Vermilion sub-station of the department of agriculture are amazing to the agriculturists living in the southern regions of Alberta. In July, 1951, crops of wheat, barley and oats gave indication of producing average respective yields of 35, 40 and 75 bushels per acre this season. And the production of forage seed and fodder has become increasingly popular in the area.

Alfalfa is a firmly established crop for seed purposes, while a mixture of brome and alfalfa is a superior hay crop in this northern region.

During the summer months, the long duration of sunlight is a major factor contributing to the rapid rate of growth. Bush fruits are grown successfully in the home garden, and success with tree fruits has been had at the experimental station. Hardy varieties of apples, crabapples, plums, and cherry-plum hybrids produce good quality fruit recently.

As in other farming localities, the horse population is giving way to the mechanized methods of farming. Cattle and swine are numerous on the small farms and most of the coarse grain is consumed by the livestock, and marketed as animal products.

There is a bright future yet for the homesteader in Alberta's northern areas and, as in the past, many hundreds of pioneers have made their first start on the road to prosperity by homesteading on government land, so it will be in the future in this rich country.

Old Age Pensioners Anxious

Old age pensioners in Alberta are a bit disturbed today over the uncertainty of their position when the new dominion pension set-up comes into effect next January. There is no definite information yet as to what attitude the provincial government will take toward the continuation of payment of \$10 extra they have been receiving from the Alberta government. This extra amount given on a no means test basis is one of the sensible and humane acts of the government, in view of the high cost of living today. But nobody knows definitely if it is to be continued when the dominion takes over care of the 70 years and over pensioners.

The Alberta government remains unnecessarily silent on its plans in this matter, when a word from the premier would solve the fears and worries of these aged citizens. At present there are about 45,000 residents of Alberta who are over the 70 age and could qualify for the old age pension benefits, and about 38 percent of these are now in receipt of the present pension paid by both the dominion and the province. It is considered possible that an additional 28,000 of the older residents will apply for the \$40 a month pension.

The provincial government so far has stated only that its policy with regard to old age pensions cannot be clarified until full details from the dominion are available, and then the legislature will consider its position early in the year. In the meantime, the government could, if it wished, make it clear that the old age pensioners of 70 or over will not suffer loss in their pension from dropping the extra \$10 monthly payment.

It is not necessary for the legislature to meet before a decision is made. The government can do as it has done on many occasions of less importance than this, pass orders in council covering the pensions. With the overwhelming majority it now enjoys, and the loyal support it is given by its members, the government would have no difficulty in gaining the needed legislative approval of its act.

The Bible Today:

"What doth the Lord require of thee, but to do justly, and to love mercy, and to walk humbly with thy God?" —Micah VI, 8.

Book-keeping Made Easy

The LIBERTY RECORD
Bookkeeping SYSTEM and Income
Tax Record
WILL SOLVE MOST OF YOUR
BOOKKEEPING PROBLEMS

So simplified that an 8th grade boy or girl can make entries
with unfailing accuracy, and will be approved by the Income
Tax Inspector.

LIBERTY is no "Crack-Pot" idea, but has been used and ap-
proved for 25 years by almost every line of business throughout
the U.S. and Canada.

We have sold thousands of LIBERTIES over the past twenty
years. Many of our old customers repeat orders from year to year
and write us "THE LIBERTY HAS BEEN A LIFE SAVER FOR
ME".

So confident are we that the LIBERTY will meet YOUR Book-
keeping needs that we make you this special offer. Order one
copy of the LIBERTY and we will send you a C.O.D. \$1.50
check, page by page. A year book. Each double page for one
week's business with annual summary in the back. Also
letterhead, ledger sheets, etc. If you are not entirely satisfied,
return the book and your money will be promptly refunded.
No argument.

Calls for Albertans To Stress Unity of Province

"It is time that we in Alberta become Albertans and not
Calgaryans or Edmontonians." This is the theme of a talk
being given all over Alberta by Tommy Steele, assistant
director of publicity for the Department of Economic Affairs.

To illustrate his point Steele
takes the listener on an imaginary
helicopter trip of Alberta.

From the pottery and flour in-
dustry at Medicine Hat he quickly
flies on to Taber to point out the
year-old \$5,000,000 sugar fac-
tory there. Then on to Lethbridge,
the irrigation capital of Canada,"
which grows and cans a tremen-
dous percentage of Canada's peas.

From the coal mines at Leth-
bridge he sweeps on to the Crow's
Nest Pass coal mines, to the St.
Mary's Dam, a multi-million dollar
irrigation project which will sup-
ply water as far east as Medicine
Hat.

After he leaves the south,
Mr. Steele takes the listener
to Drumheller, also the centre of
a tremendous coal industry.

After Drumheller comes Cal-
gary, the Stamped City. During
the last five years Steele points
out, 94 plants with capital ex-
penditures of \$28,000,000 have
located in Calgary. These plants
employ over 1,800 persons and
have an annual payroll in excess of
\$4,500,000. In the same period
of time 250 and 300 consumers
had already been con-
nected to the distribution system
and the work of connecting the
remaining 700 consumers would
be done as quickly as possible.

The 61-mile transmission line
between the gas field and Banff
will carry an average of 100 mil-
lions of cubic feet per day during the
winter for Banff consumers and

An eight-inch line from Jumping
Pound to Exshaw is already in
operation. The line from Ex-
shaw to Banff is six inches in
diameter.

Wetaskiwin is also just at the
birth of its industrial development
according to Mr. Steele. He claims
that many secondary industries
want to locate in Alberta to gas
and settle there because they will find
better locations and facilities
there in their particular cases.

From there his flies over the
Peace River and Lloydminster
areas, ending up at Edmonton.

Edmonton, he explains, had the
beginning of its phenomenal
growth with the oil fields dis-
covered first at Leduc in 1947.

Since then three oil refineries
have been built on its outskirts
and a new chemical plant is now
under construction in the north-
ern city.

Other Alberta resources outlined
by Mr. Steele are power and
salt. The oil sands are also fea-
tured in his talk.

IN HOLLYWOOD

Movie Stars Using New Kind of 'Falsies'

By VIRGINIA MACPHERSON

HOLLYWOOD—The skinny gals around town are going in for a new kind of "falsie." Now they're padding their hips.

That's what dance director Charles O'Curran says, anyway. And he says the gents started it all.

"Men like their girls plump nowadays," he explained. "Not fat—but just pleasingly rounded. Trouble is, the girls can't fill the bill."

O'Curran thinks they've been taking fashion magazines too seriously.

"They've been ogling all those matchstick mannequins," he growled, "and for a long time it was stylish for all girls to look like beanpoles."

"They've been disguising their shapes for years. Eating like birds and mashing away the curves with the rolling pin."

But all of a sudden, he says, the girls who look like pencils in the shower are blossoming forth with hourglass figures.

"They're padding their hips and thighs," he disclosed.

O'Curran says he stumbled across their secret when he was interviewing chorines and dancing girls for Paramount's "Aaron Slick From Punkin' Creek."

"We had the darndest time," he sighed. "We wanted girls whose thighs and derrieres were pleasantly plump—but not overly so. I'll bet we talked to 1,000 girls before we signed the 100 we needed."

"Some would walk into our office looking very tempting in their street clothes. When they changed to rehearsal outfits. And in their dancing costumes they looked like they'd lost 20 pounds in 20 seconds."

"I finally figured they'd been hiding their lack of form by padding their skirts to round out their hips. It's a new use for 'falsies'."

O'Curran says they must be using this padding in bathing suits and sports clothes, too. Because a lot of cuties he's seen on the beaches lately looked awful good.

"Hips are coming back, thank God!" he added. "This is a complete swing of the pendulum from the early 1900's. Four or five decades back, too many women were fat and sloppy. Corsets gave 'em that hourglass shape."

Two Pilots Killed In Jet Plane Crash

CHATHAM, Ont. (BUP)—Two American pilots were killed and one woman seriously injured when two Sabre jet fighters collided and crashed on a farm near here.

Thirty-five-year-old Mrs. Fred Demeester is in hospital at Chatham. She was hit by flying debris when the two planes hurtled into a large barn a short distance from her farm home.

Identification of the two U.S. pilots, who were both thrown clear of the burning barn, is being withheld until next of kin are notified.

The two F-86 jet fighters were based at Selbridge, Mich. United States Air Force authorities are investigating the crash.

Oil Production Shows Decline In Alberta

Alberta crude oil production averaged 173,028 barrels per day during the week ending Sept. 24, a drop of more than 5,000 barrels daily from the previous week.

The decline was shown in the weekly report of the Alberta Petroleum and Natural Gas Conservation Board, released Saturday.

Production in the Leduc-Wood-

BEAR REJECTS FRIENDLY FACE

CALGARY.—(BUP)—One Calgary man will probably steer clear of feeding the bears in Banff National Park from now on.

The man, identified only as a Mr. Hunt, had his face gashed and his nose badly hurt by a she bear who took a swipe at him with her paw. The bear attacked Hunt while he was feeding one of her cubs.

bend field declined from 50,554 barrels to 48,933 barrels, while output at the Redwater field fell from 98,934 barrels to 94,137 barrels.

At Lloydminster, the decline was from 3,115 barrels to 2,317 barrels. Some other fields showed

MARGARET LAXDAL, 68, Winnipeg, who was left \$240,000 by a Minneapolis bachelor who described her as his true friend. Miss Laxdal said that after obtaining a home for herself she would use the legacy for "a good cause."

similar drops, but production at Acheson and Big Valley rose during the week.

Africa is within ten miles of Europe.

Doctors Perfect Device To Study Human Body

STANFORD, Calif.—(UP)—A teaching doctor at Stanford University and a research engineer from Portland, Ore., have completed the first phase of a project that may be important to medical education.

The project is a complete atlas of human anatomy in three-dimensional kodachrome transparencies, each keyed to a matching diagram drawn to scale.

The work is being carried out by Dr. David L. Bassett, associate professor of anatomy in the Stanford medical school, and his colleague, William B. Gruber, inventor of a modern stereoscope known as the "View Master."

They have finished the painstaking task of photographing 238 related dissections of the human central nervous system.

It has taken them two years to complete this section of the stereoscopic atlas and it will be published early in 1952. It will take them six to eight years and some 2,000 dissections and photographs before this project is finished.

A stereoscopic atlas of human anatomy is not a brand new idea.

REALLY SITTING ON POWDER KEG

VANCOUVER (BUP)—A Vancouver family has lived over two kegs of dynamite for 21 years.

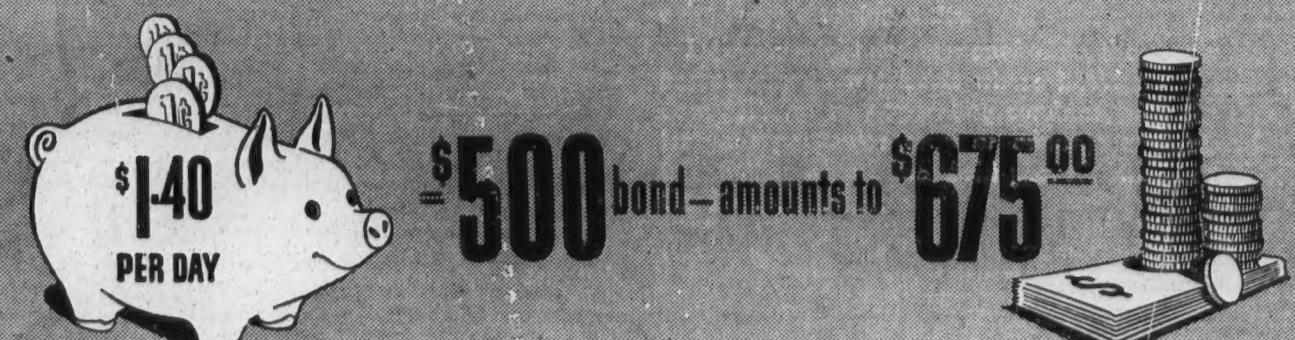

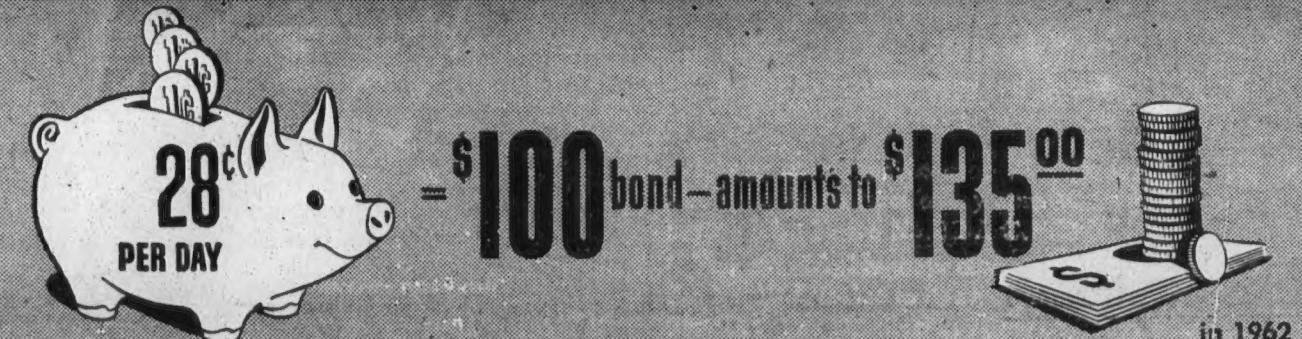

The discovery was made by Frank Fraser while making alterations to his basement.

The dynamite was promptly soaked with a solution of alcohol, water and lye in an effort to render it harmless.

Bassett points out that the University of Edinburgh published such an atlas before the turn of the century. There have also been other attempts to make use of stereoscopic views as a teaching method.

Norwood exported 4,000 tons of butter in 1950.

So little per day now...adds up to so much later!

The Lighter Side

A Wilt as Good as a Will
A passerby stopped to watch an old man in his garden weeding.

"Which weeds do you consider the easiest to kill?" he asked.

"Widow's weeds," answered the old man. "You only have to say 'Wilt thou,' and they wilt."

Hostess—"Very likely; but she might have had the decency to assume that I do."

Trouble

"My fiancee is terrible deaf, and this has got me in awful trouble."

"How's that?"

"Well, I had to yell so loudly when I proposed to her that the woman living in the flat above has sued me for breach of promise."

Snakes Won't Hurt You Unless You Scare Them

DAYTON, O.—(BUP)—Snakes do not milk cows, roll in hoops, hypnotize birds, or have poisonous breath. The snake organization says there are but two poisonous varieties in Ohio—the rattlesnake and the

copperhead. Neither is too common, but they are still found in damp places in the state.

These are myths about snakes that the Dayton snake petiologist is trying to dispel, along with fear of snakes. Through the centuries a mass of myth and superstition surrounding snakes has been developed. But fear of serpents is the most deplorable attitude of all the misconceptions people have of snakes, according to the Dayton snake petiologist.

The fear of snakes, according to snake scientists, is not instinctive. A baby will fondle a garter snake just as readily as it will a cute puppy. But a frightened mother, rushing to rescue her child from

Fire Chief Has Eyebrows Singed

MEDICINE HAT, Alta.—(BUP)

the harmless garter snake, can cause a life-time fear of all snakes.

The herpetologist has conquered his fear of reptiles and handles them nonchalantly. But even the expert herpetologist may handle a poison snake不慎ly.

Fear and snakes is a two-way proposition, the Dayton snake fanciers say. Just as most people fear snakes, the serpents themselves don't care to have anything to do with people. Snakes will do their best to avoid meeting people. When they strike, it is in self defense.

Poisonous snakes are the ones that must be recognized. The Day-

ton Fire Chief R. A. Sandra, 3, escaped unharmed after took a woman and her two young children to safety up a horn upper floor when the fire broke in basement stairway today as out.

The Chief had his hair and eyebrows singed but Mrs. T. H. Cory and her children, Gordon, 4, and

Here are some car features that you'll quickly recognize as "quality features". There's a kind of features you'd expect only in high-priced cars. Now let's see who offers these features as standard equipment, among the cars in Plymouth's price class!

Here are Plymouth's
"Yes" or "No"
answers on value
in the lowest-priced
field

This is only the beginning of the Plymouth Value story! Your local Plymouth dealer has the new Quality Chart showing many more of Plymouth's big-car Quality Features. Let him show you how Plymouth gives you 19 out of 20 of these big-car features while car "A" gives you 11—and, car "B" only 6! He'll show you what the difference is in comfort, comfort, safety and performance. And, as a final test—he'll ask you to drive Plymouth! Then, you'll find Plymouth rides like a big car because it's a big-car-built—to serve you better!

VALUE FEATURE

SAFETY-ARM WHEELS
Hold tires firmly on rim in case of blowouts. A valued safety feature.

PLYMOUTH CRANBROOK

CAR "A" **CAR "B"**

YES NO NO

CHAIN-HEIGHT SEATS
At least 15½" high for erect, natural posture and full support.

YES NO NO

OIL FILTER
Assures clean oil to engine—important contribution to Plymouth's long engine life.

YES NO NO

ELECTRIC WINDSHIELD WIPERS
Unlike the vacuum type, they don't slow down when you step on the gas.

YES NO NO

SPLASH-PROOF IGNITION SHIELDING
Assures quick, easy starts in damp weather—avoids stalling on flooded streets.

YES NO NO

IGNITION-KEY STARTING WITH AUTOMATIC CHOKE
Eliminates over-choking. Just turn the key; the engine starts.

YES NO NO

SIX CYLINDER BRAKES
Two extra hydraulic cylinders at the front wheels give you better, more certain control.

YES NO NO

REAR-OIL INTAKE
Flows oil below the surface of oil in crankcase to give only the cleanest oil.

YES NO NO

CHAIN-CARSHAFT DRIVE
Has more contact area than the direct gear-type, so wears less and runs quieter.

YES NO NO

FLAT-SPRING POWER
A way of mounting the engine so it's balanced and cushioned for extra smoothness.

YES NO NO

OIL-FILLER FILTER
Keeps water as well as dirt from entering fuel tank. Self-cleaning.

YES NO NO

INDEPENDENT PARKING BRAKE
A separate system from the service brakes—gives you an extra margin of safety.

QUESTION: Who is eligible to open an Annuity account?

ANSWER: Any Canadian citizen resident in Alberta for three years preceding application is eligible and may continue deposits even though he or she later leaves the Province.

QUESTION: How do I become a Depositor?

ANSWER: Applications will be received at any office of the Provincial Treasurer or at the office of the Deputy Provincial Treasurer, Legislative Buildings, Edmonton, where Agreement forms may be obtained.

QUESTION: What payment shall I be required to make?

ANSWER: An initial deposit of at least \$100.00 is required and thereafter deposits of not less than \$5.00 will be accepted at any time convenient to the Depositor. Deposits may be made at any branch of the Provincial Treasurer, Edmonton, or at the office of the Deputy Provincial Treasurer, Edmonton.

For Full Information
See your

Provincial Treasury Branch
or write Deputy Provincial Treasurer,
Edmonton.
